

Docket No. F-8177

Ser. No. 10/816,017

AMENDMENTS TO THE CLAIMS:

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1-4. (Cancelled)

5. (New) A portable irrigator, which is hand operable for irrigating an interior of a large intestine or an interior of a vaginal canal comprising:

a suction hose for sucking a liquid contained in a liquid reservoir, an air pump for supplying the sucked liquid to an injection nozzle, and the injection nozzle for injecting the supplied liquid into the interior of the large intestine through an anus or directly into the interior of the vaginal canal, wherein:

a liquid supplying body is rigidly connected to said suction hose, said injection nozzle, and said air pump, and is provided with an entrance/exit passage for supplying the liquid sucked through said suction hose to said injection nozzle;

said suction hose is integrally connected to a flange, said flange being disposed in said body, and said injection nozzle includes a plurality of holes disposed in a radial direction at a front end thereof and is connected to a connecting member in a spiral manner so as to be detachable from said body; and
